About food allergies

We handle a variety of ingredients in our kitchen of PGM golf courses. It may be possible that some ingredients that are not used as raw materials for the dishes we provide get mixed in while cooking. Allergic symptoms may appear with even a small amount of allergens, depending on the severity or physical condition of each customer. We would like to ask those customers in particular who are overly sensitive to food allergens or have very serious allergic symptoms to be very careful.

Cases of possible allergen contamination

*Kitchenware, tableware and frying oil are shared.

*Foods are kept in a shared storage space and cooked with shared utensils and devices.

*Spaghetti, udon noodles and soba noodles are boiled in the same boiler.

We kindly ask for your understanding in advance in case you have any food allergies.
